MARCO TERNI POLETTI

ITAS is the stage name of Marco Terni Poletti, the name ITAS it's just the acronyms of Italian Technologies Art & Style.

In 2013 in Codogno, a small city south of Milan, Marco, as an expert technician with more than 25 years of experience gained in jewelry technologies and high technological machinery just started his dream. The dream was to be free to use his know-how and creativity just for the pleasure to create decorative metal panels and wall globes, and artworks out of the box.

Marco created art metal decorations and being the only one to realize these artworks have started the first collaborations with luxury furniture producers, contract companies, and interior designers studios. So thanks to these companies that started to include these artistic metals and wall globes in their projects.

It was the first time that the maps could be reinterpreted in artworks. Real wall jewels not to wear, but dedicated to the environments we live in. Considering every part of the earth as an amazing jewel has sprung the idea to also give real preciousness and artistic value to every map.

Metal panels and modern material artworks are a blended exclusive mix of creativity, technologies, natural materials, extreme workmanship, engraved metals, and 24k gold.

Bergamo - Italy

MARCO TERNI POLETTI

Two elements make it possible to create these artworks, the first is a strong passion for all kinds of art engraving of metals - by the chisel, EDM (electric discharge machining), chemical, mechanical, etc. The second is the use of noble materials such as copper, bronze, steel, brass, 24k gold as well as genuine mother-of-pearl, stone, and wood.

The passion for jewelry works, extreme workmanships, and engraved metals are the basis of each work. Know-how, craft skills, precious materials, and technologies used in an unusual way, unique in the world.

Extremely technical and geometrical precision allows faithful materials reinterpretation of paper maps turning into real wall jewels. Countries, islands, different elements and details made with metals where each insert is in fact like a real jewel.

Each art panel means hard work, patience, creation of hundreds and hundreds of perfect metal inserts, that are engraved, cut, polished, enameled, and inlay one by one by hand. So metals and materials that make it into a refined new kind of artistic metal mosaic.

Harmonies and contrasts of metals and materials that convey emotions, elegance, light ,not only for yachts, offices, homes, or the Ho.Re.Ca sector but for any kind of interior. Artworks that always arouse strong interest, admiration, and refinement , giving the greatest prestige to any environment.

WE CONQUER THE WORLD FOR YOU

Bergamo - Italy

MARCO TERNI POLETTI

His passion is to create artistic metal world maps (and metal artworks on demand) with techniques, materials, metals and 24k gold used to create real jewelry.

Decorative 2D boat models on demand and also art wall globes that want to be a tribute to the beauty, remembering first of all the beauty of the world and the great fortune of being part of it.

His works are a mix of mother of pearl, 24k gold, hundreds of metal inserts that are engraved, cut, painted and inlaid one by one by hand in stone and wood.

The artistic representation of the earth is never banal in any context. The world map always reminds us of travels, experiences, events, business, memories, places, and people.

For home, yacht, office and the most prestigious interiors our artistic panels confer the greatest prestige.

Natural materials and metals

This art panel includes numerous metal inserts and many engraved writings. It needed more than 5 months of engineering to prepare tools and equipment to be able to produce it. The metals used are; bronze, copper, stainless steel, brass, aluminum, and 24k gold. The metal inserts are engraved in low relief than brushed, glazed, and hand fixed one by one transforming it into a wonderful metal mosaic on a gray stone background.

This panel is made with more than 300 different metal pieces with more than 1000 engraved writings glazed by hand. All the engraved writings indicate all the most important cities. Each region is a different piece in different metal as well as all the major islands. All metals are mounted on a sheet of genuine gray slate. The stone is contoured, varnished, and digitally printed in the names of the islands, oceans, etc. Overall metals fixed on the stone are then fixed on a special lightwood base panel varnished wengè color and polished by hand with wax. The slate sheet is all frosted and leveled by hand in order to apply all the metals in such a way as not to create differences of planarity between the metals. In the left corner below there is a steel summary with all the information on the map.

All the brass inserts present are 24k gold finished.

FULL DESCRIPTION

Natural materials and metals

This art panel includes numerous metal inserts and a giant number of engraved writings. It needed more than one year of engineering to prepare tools and equipment to be able to reproduce it again. The metals used are; bronze, copper, stainless steel, brass, aluminum, and 24k gold. The metal inserts are engraved in low relief than brushed, glazed, and hand fixed one by one transforming it into a wonderful metal mosaic on a gray stone background.

This panel is made with more than 200 different metal pieces with more than 5000 engraved writings glazed by hand. All the engraved writings indicate the most important cities, villages, Indian reserves, railroads, highways, airports, lakes, rivers, mountains, etc. Each nation is a different piece in different metal as well as all the major islands. All metals are mounted on a sheet of genuine gray slate. The stone is contoured, varnished, and digitally printed in the names of the islands, oceans, etc. Overall metals fixed on the stone are then fixed on a special lightwood base panel varnished wengè color and polished by hand with wax. The slate sheet is all frosted and leveled by hand in order to apply all the metals in such a way as not to create differences of planarity between the metals. In the left corner below there is a steel eagle that is the USA national symbol. This symbol is removable because hidden it is present the Puerto Rico island map. We thought this solution because probably Puerto Rico could be the next country which probably will be included in the USA, so it is ready for future events. The perimetral frame is made with stainless steel engraved and contains the numbers of parallels and meridians. The summary in the corner right below is made with steel finished " mirror " with all the USA flags inlay. Also present in it a large fine label 24k gold finished (word united states) and all the information on the map.

LUXURY SURFACES

The artistic world maps permitted Marco Terni Poletti to start collaborations with interior designers, and furniture producers. Frequently he creates artistically engraved metals and decorations for different applications. For exclusive environments, he create wall coverings and decorative panels as well metal decor, metal signs, and plates.

On demand, he produces wood & marble tiles with 24k gold inserts and other metals inlaid, and also art metals slabs to decor furniture, walls, doors, ceilings, lifts. Lately even artistic metal labels and inserts for various brands in different sectors.

As mentioned about the metals ,he doesn't use lasers, CNC milling, waterjet cutting, or other common technologies but jewellery technologies so our focus is to obtain always the perception of real jewelry art in all of our works. He is proud to affirm that he is a unique artist that gives this kind of support about the artistic metals applications. Art metals created with strong adhesive on the back, simply to apply directly (like stickers), in an easy way is possible to obtain exclusive decoration of walls, surfaces, furniture, ceilings, doors, lifts, external glasses.

OTHER INFORMATION

Certificate of Origin and Authenticity

Every work is equipped with an Authenticity Certificate signed by Marco.

—

The products shown are unique pieces and the prices are indicative. Each product can be customized according to customer needs.

He also creates works and personalizations on-demand. His artwork also can be used to emphasize the prestige of companies, offices, hotels, clubs, etc. Logos and other requests can be made, however, please contact us for an estimate on product delivery and description. Depending on the request the time of delivery will vary. You can contact us directly and we can propose some options.
